My Book of MAZES

THINGS THAT GO!

If your child can use a pencil fairly well and enjoys mazes, then this book will build on that foundation.

Use this book to help your child gain firm pencil skills and spatial reasoning ability while having fun with mazes of cars, trains, and planes.

My Book of

MAZES THINGS THAT GO!

How to hold a pencil properly

There are several ways to teach children to hold a pencil properly. Here is one example.

1

Help your child form an "L"

The aims and purpose of this book

This book gives your child the opportunity to develop his or her manual dexterity and pencil-control skills by tracing lines through mazes following clear directional indicators. Children love things that go, and they will enjoy these mazes full of ships, cars, and planes. Mazes allow your child to draw lines creatively and thereby practice the pencil skills necessary for writing letters and numbers. This practice will also help your child acquire the ability to concentrate, which is a crucial study skill.

When children work on a maze, they usually follow this pattern:

- They view the whole maze, and then look closely at the individual parts.
- They analyze the maze to find the way to the exit.
- They physically draw a line from the entrance to the exit on the maze.

Therefore, mazes help children develop their ability to analyze what they see and then physically act upon their understanding.

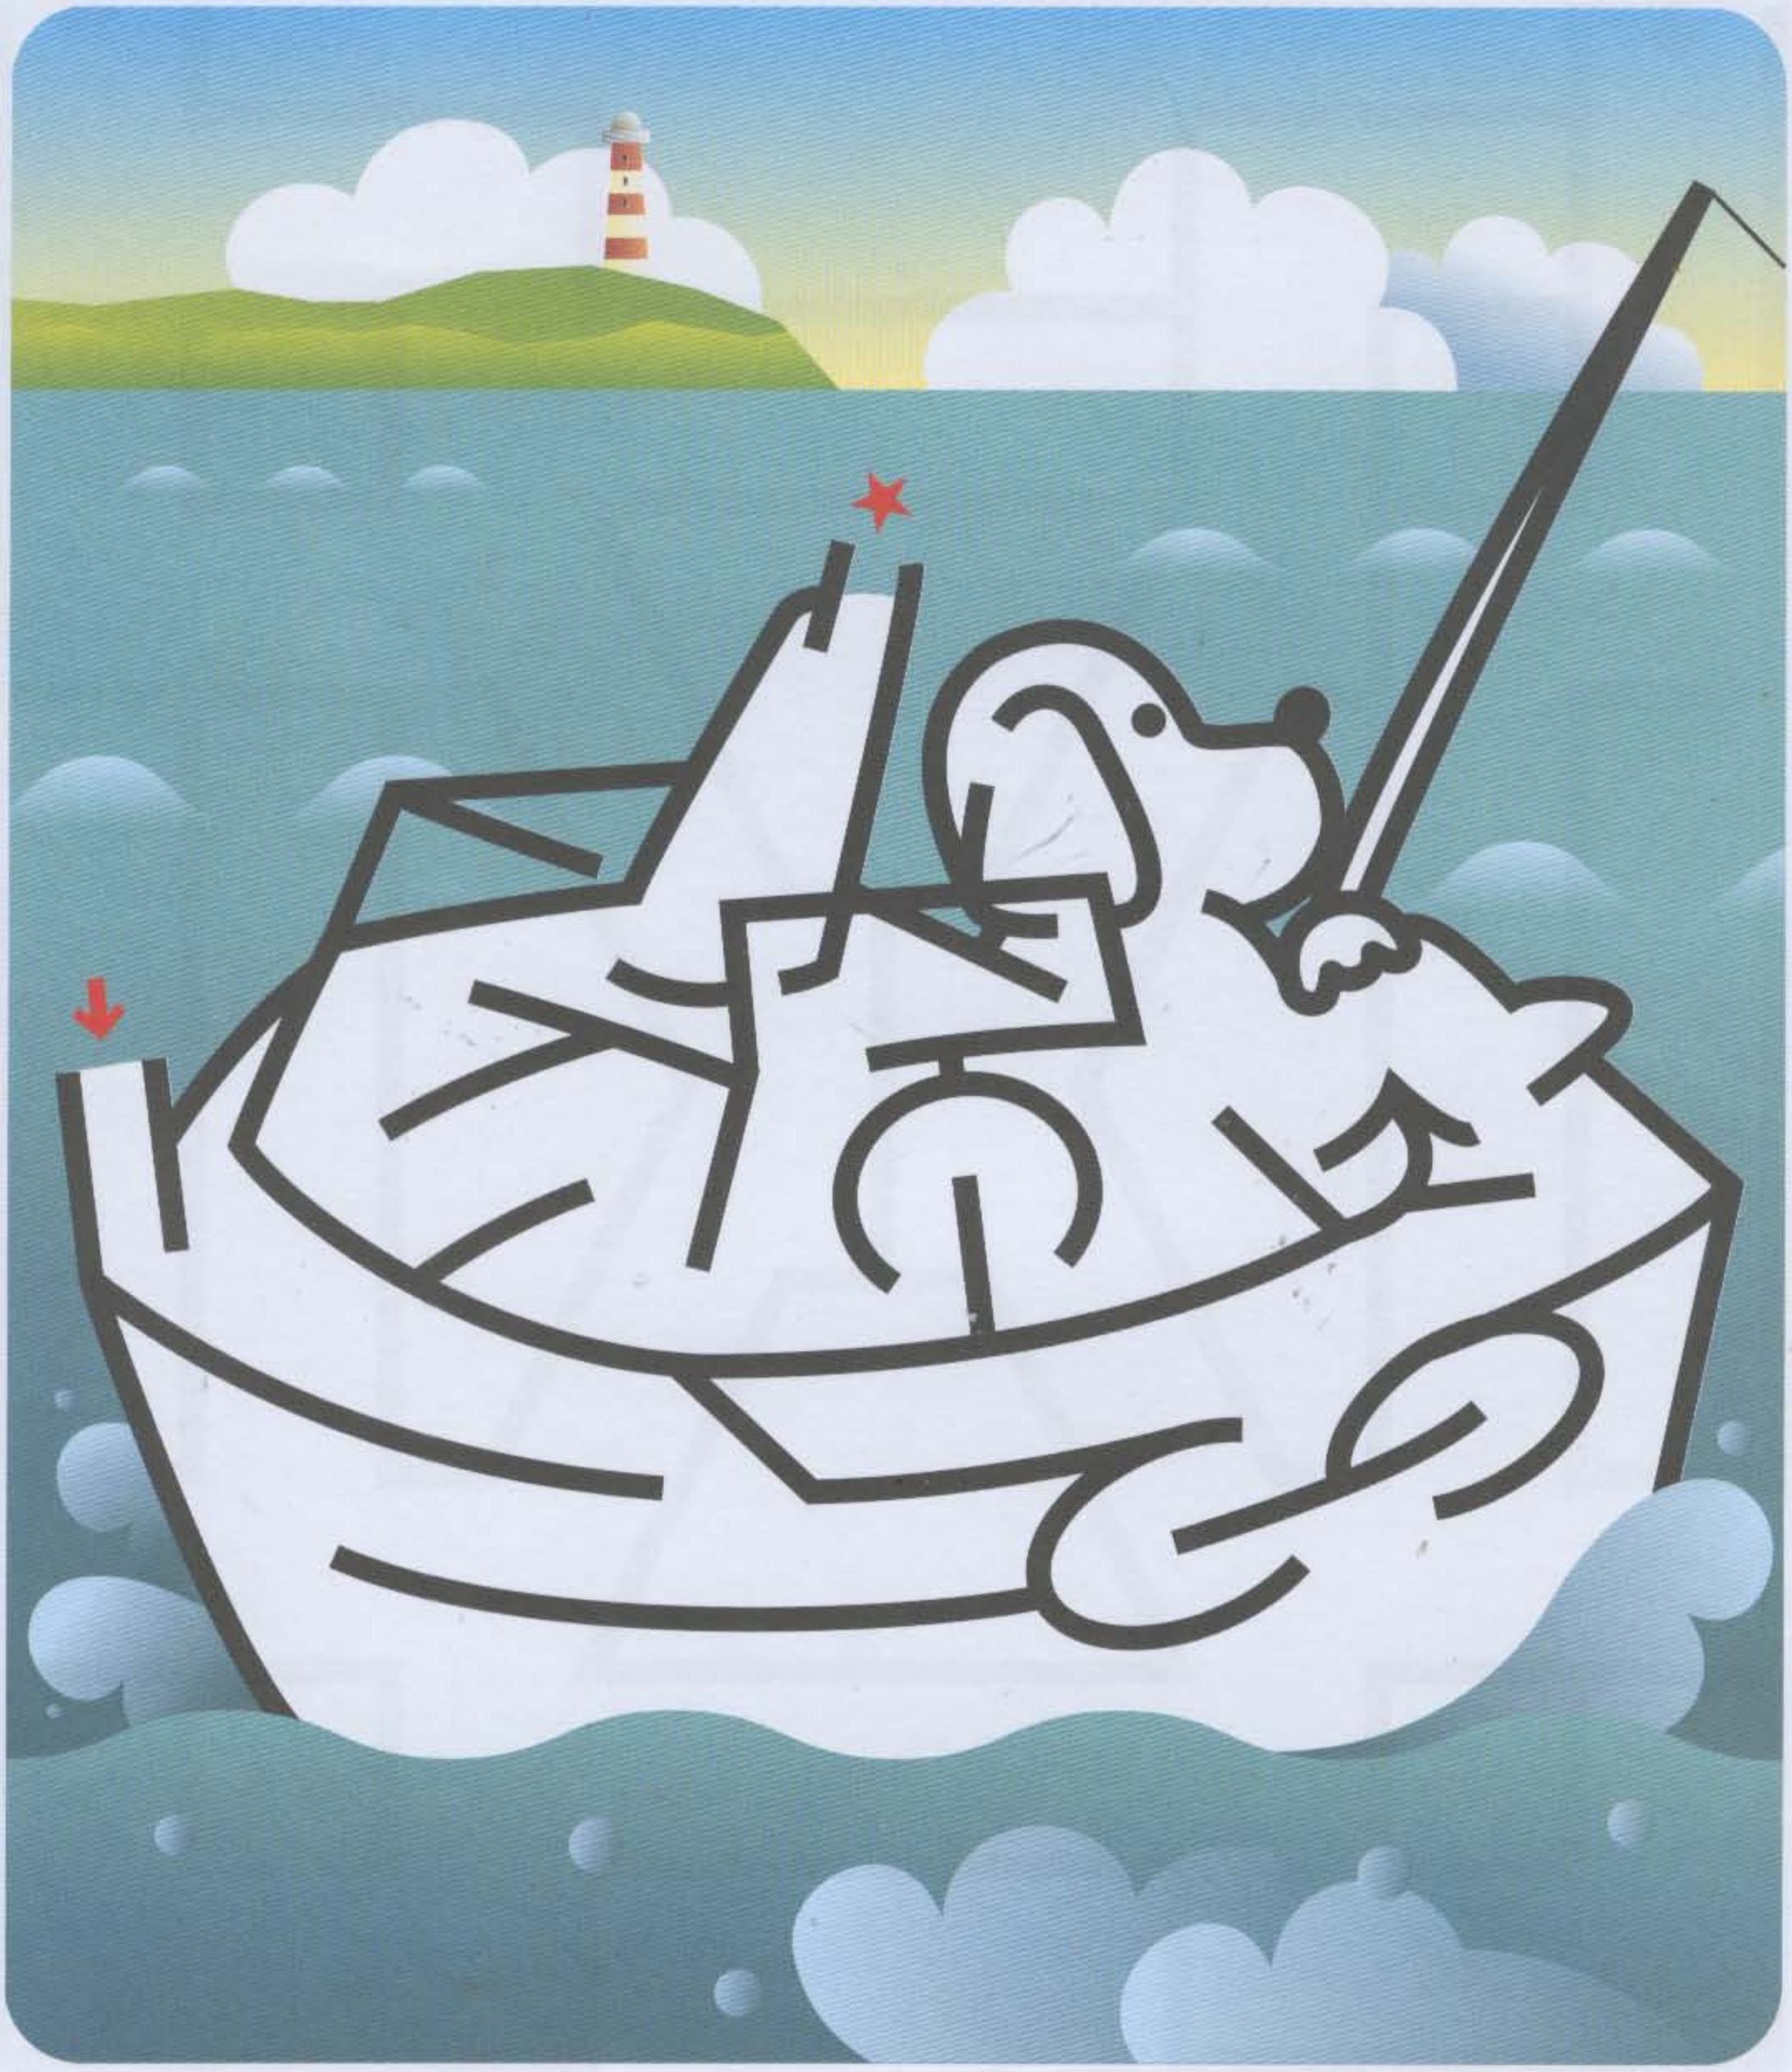
To parents
Have your child trace a path through the maze with his or her finger before using a pencil. Next, have your child use a pencil to complete the maze. When your child is done, give him or her plenty of praise.

■ Draw a line through the maze from the arrow (➔) to the star (★).



■ Draw a line through the maze from the arrow (➔) to the star (★).

To parents

Did your child enjoy these mazes? When your child is finished, compare this page with the first few pages of this workbook. You will see considerable progress in his or her ability to control a pencil. Please give praise for your child's effort and achievement.
