BLACK PANTHER PAPER PUPPET
Thank you for downloading this resource!

PAPER CHOICE
Altough this resource may print on any type of paper thickness I would recommend a heavyweight white matte photo paper or cardstock. The resource is formatted to papersize A4 (21.0 x 29.7cm or 8.27 x 11.69) but can also print perfectly on U.S. Letter (8.5 x 11 inches).
INSTRUCTIONS
1. Print the resource.

2. Cut out the individual parts of each puppet.

3. Make a small hole with a needle or something similar on each leg, arms and body of the puppet.

Make the hole in the center of the bigger white circles marked on the upper and lower body. Repeat this process on the bigger white circles on the legs and arms.

4. If you want to make the puppet into a jumping jack or string puppet you also need to make a hole in the center of the smaller white circles on the legs and arms. This is were you put the string. If you want to make a JUMPING JACK go to step 5.

If you don't want to make a JUMPING JACK and simply make a regular paper puppet you can skip this part and simply fastened the puppets arms and legs with brass fasteners. Put the fasteners through the premaid holes. The arms and legs should first be placed behind the body.

5. To make a jumping jack or string puppet, you need to slide a piece of string through the holes you made in the small white circles. You can either make a small knot to keep the string in place or loop the string and tie it together. Repeat this process for the arms and legs. Then take a longer piece of string and tie to the to pieces of string connecting the arms and legs.
